# 360° Virtual Tour

Have you tried Laser Surveys' new way to record, explore and share your project?

If you're stuck at home and can't get to site, or have just started a project and need easy access to project data without revisits or piecing together photos a 360° Virtual Tour could be perfect for you.

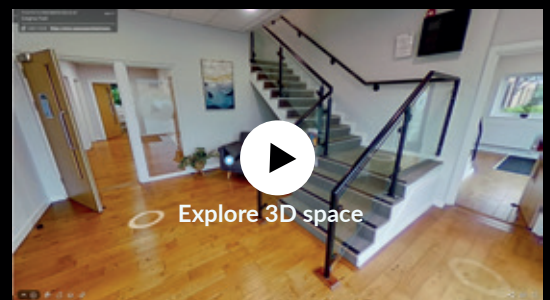

With the use of Matterport, Laser Surveys can now capture a unique digital twin of your project through a collection of high quality 360° photos, which are stitched together to create a highly interactive, attractive and high clarity 3D model. You and your clients can then move through the space from a real-life perspective.

Why not have a look at our [website](#) to find out more and have a go on our samples? It's really easy to use, and with a range of views it gives you a great way to get a feel for a space without physically being there.

Prices start from £199 + VAT as a bolt-on to a measured building survey, and from £299 + VAT as a stand alone deliverable.

Why not get in touch for a [quote](#) now?
